

Minasan konnichiwa (Hi everyone)

I have received a request from the Frankston Council Environment Education Officer to invite the wider community to participate in the **Community Climate Change Survey**. We have been receiving support from Frankston Council for our environment education. Annual free native plant donations for our annual Tree Day activities have been given to us. This year, we were very fortunate to receive a fully subsidized biodiversity incursion for Year four students to learn about the importance of creating spaces for our native animals.

Frankston Council is running a **Community Climate Change Survey** and would like to hear the community members' ideas and concerns regarding climate change. The aim of this survey is to direct the council's efforts to the areas most needed. The survey is open until **Wednesday 26 August**. The more people who complete the survey, the better picture the council will have of our community's ideas, priorities and ways to work together to meet the challenges of climate change at a local level.
