Miss Saigon tells the tragic tale of a young Asian woman and her relationship with an American soldier during the Vietnam War in the 1970's. In the midst of the darkness of war this unlikely romance blossoms giving birth to a child, however it is the ultimate sacrifice of a mother for her child that forms the central theme of this musical. While the scenario is a grim one, the powerful music and surging choruses give Miss Saigon an emotional depth that accounts for the show's enduring popularity. The evacuation of the last Americans in Saigon from the Embassy roof by helicopter leaving behind a crowd of abandoned Vietnamese people epitomises the struggle and the desperation of a people at war.

Miss Saigon is the second success for the partnership of Claude-Michael Schönberg and Alain Boublil, following on from Les Misérables. Extraordinary ticket sales around the world have ensured that Miss Saigon will continue to enthrall audiences for many years to come.
